### Who we are

At Roche, 80,000 people across 150 countries are pushing back the frontiers of healthcare. Working together, we've become one of the world's leading research-focused healthcare groups. Our success is built on innovation, curiosity and diversity, and on seeing each other's differences as an advantage. To innovate healthcare, Roche has ambitious plans to keep learning and growing – and is seeking people who have the same goals for themselves.

### The Position

In this service function, you are responsible for providing clinical pathological input to Pharma projects. The position 100 % owns microscope reading of stained slides, and thereby supports research and development activities for assay development that includes primary antibodies, detection systems, molecular probes, and special stains, and for clinical testing of tissue samples.

- ◆ Provides pathology and slide reading support to integrated Joint Histopathology Lab between Roche Penzberg and Roche Tissue Diagnostics. This includes basic histochemical diagnostics of tissue pathology as well as qualitative and quantitative assessment of biomarker distribution patterns on tissue sections
- ◆ Ensures that projects follow state-of-the-art guidelines for histopathological diagnostic
- ◆ Monitors work to ensure quality, and continuously promotes QA/QC required for projects
- ◆ Facilitates integration into pathologist community at Translational Research Sciences (TRS) Penzberg and Ventana Tucson
- ◆ Strong relationship between the Histopathology Lab in Tucson, Arizona and in Penzberg

### Who you are

You're someone who wants to influence your own development. You're looking for a company where you have the opportunity to pursue your interests across functions and geographies, and where a job title is not considered the final definition of who you are, but the starting point.

- ◆ You are an experienced medical doctor with board certification in Anatomic / Surgical Pathology and have minimum two years relevant scientific experience in industry and/or a clinical environment
- ◆ You have in depth experience in the theoretical understanding and basic practical skills in histochemistry and molecular histopathology technologies, i.e. immunohistochemistry and in situ hybridization
- ◆ Demonstrated record of accomplishments (e.g. publications in scientific journals, issued patents)

- ♦ Deep and continuously updated knowledge of clinical oncology and pathological guidelines
- ♦ Willingness to contribute to different types of data analysis
- ♦ Ability to make correct diagnostic decisions on high volume sample collectives
- ♦ You have the ability to carry out action plans
- ♦ Furthermore you show excellent written and communication skills
- ♦ Speaking German is mandatory, English must be fluent

The next step is yours. To apply today, click on the "Apply online" button below.
